

OVERVIEW

As teachers, we typically spend more time preparing to handle “wrong” answers than we do the “right” ones. Should a correct response signal that our work is done or are there other opportunities to consider? In this conversation, you’ll have an opportunity to dig into different ways to respond when students give correct responses or demonstrate correct work.

SPARK MEDIA & FOCUS LESSON

Animated Video

A teacher considers a variety of ways to respond to a student’s right answer, in the lesson [Hair Today, Gone Tomorrow](#).

PEDAGOGICAL THEME

Deepening Mathematical Understanding

USING THE CONVO GUIDE FOR A GREAT ROUNDTABLE DISCUSSION

- This conversation is designed for a group of 2-5 educators over 30-60 minutes.
- The Convo Guide serves as an agenda for a roundtable conversation where everyone is there both to learn and to share their expertise.
- Each participant should have their own copy of the Convo Guide and access to the Spark Media.
- Pace yourselves to get through the entire agenda in the time you have.
- Questions aren’t intended to have a single right answer; instead, they’re designed to spark rich discussions.
- At the end, everyone will commit to trying “one small thing” the very next day. Consider how you might follow up with one another!

OBSERVE

5-15 MIN

- To start, take a look at the Spark Media.
- What do you think is likely to happen next after each of the teacher's responses?
- What do these six responses communicate about who owns the expertise and responsibility for making meaning in the classroom?

DISCUSS

10-15 MIN

- When do you think each approach is best? How might these responses affect the class, beyond that single student?
- What goals/intentions might a teacher have when responding to a "right" answer?

RELATE

10-15 MIN

- In your own practice, how do you tend to respond to "right" answers? Which of the approaches do you rarely use?
- Are there ways of responding to "right" answers you'd like to do more of in your own practice? What challenges will you need to overcome to do this?
- To prepare to respond to students "right" answers while teaching, what could you think about or do during your lesson planning?

...AND COMMIT!

5-10 MIN

- What is one small thing you can do tomorrow in support of those shifts?
